EDUCATION

- B.Eng (Hons) in Software Engineering**
University of Westminster Undergraduate
(2025 - Present)
- Foundation Certificate in Higher Education Program**
Information Institute of Technology
(2024 - 2025)
- Diploma in Information Technology**
ESOFT Metro Campus
(2023 - 2024)
- Primary and Secondary Education**
Sumedha collage Gampaha
(2012 - 2023)

SKILLS

- Management Skills
- Organization
- Work Ethik
- Critical Thinking
- Communication Skills
- Digital Marketing
- Teamwork

PROFILE

Software Engineering undergraduate at IIT, Sri Lanka, with hands on experience in Python, Java, and web development. Strong foundation in algorithms, data structures, and basic machine learning concepts. Actively contributes to the Coding Club and Tech Society, demonstrating teamwork, problem solving skills, and a commitment to continuous learning and professional growth.

TECHNICAL SKILLS

- Languages: HTML, CSS, JavaScript, PHP, Java, SQL (MySQL)
- CMS / Platforms: WordPress
- Front-End: Responsive web design, UI layout structuring, cross browser compatibility, performance optimization

PROJECTS

- SMART MOBILE HEALTHCARE MONITORING APPLICATION** (2026 - PRESENT)

Developed a fully responsive café website featuring interactive sections such as menu display, gallery, and reservation system. Focused on delivering a modern and visually appealing UI with smooth animations and transitions. Applied mobile first design principles to ensure seamless performance across all devices. Structured the front end using clean and scalable architecture for maintainability. Enhanced user experience through intuitive navigation and well organized content layout

Technology used :Flutter,UI/UX Design, APIs ,Team Collaboration, Problem Solving,Software Documentation.
- BLEND CAFE – MODERN RESTAURANT WEBSITE** (2026)

Designed and developed a mobile application for monitoring patient health data and supporting remote healthcare management. Enabled real time alerts and efficient access to health information for timely decision making. Applied user centered design principles to ensure accessibility and ease of use. Integrated APIs to enhance functionality and enable smooth data communication. Collaborated within a team environment while maintaining proper documentation and code quality.

Technology Used: HTML, CSS, UI/UX, Front-End Development

LANGUAGE

- English (Native or Bilingual)
- Sinhala (Native or Bilingual)
- Tamil (Elementary)

• STAYPRO – HOTEL MANAGEMENT WEB APPLICATION (2026)

Designed and developed a hotel management web interface including room listings, booking workflows, and service presentation. Emphasized usability and responsive design to ensure accessibility across multiple devices. Implemented structured data flow and component based design for better organization and scalability. Focused on clean UI architecture and efficient content management. Improved overall user experience through intuitive navigation and clear information hierarchy.

Technology Used: HTML, CSS, JavaScript, CRUD Concepts, UI Architecture

• AI PLANT DESEASE DITECTION SYSTEM (2024)

Developed a prototype AI powered application to detect plant diseases using leaf image analysis and provide treatment recommendations. Aimed at reducing crop loss and improving plant health for farmers and gardeners. Designed intuitive user interfaces for easy interaction and accessibility. Implemented structured data handling and basic analytical processing for accurate results. Focused on delivering a practical solution combining technology with real world agricultural needs

Technology used : Figma , Visual Studio Code, SQL, Gut Hub, Ms Excel

• THE SMART SUPER MARCKET STOCKMANAGEMENT SYSTEM (2024)

Developing an automated stock management system to modernize supermarket operations through real time inventory tracking and integrated food ordering. Focused on reducing manual errors and improving operational efficiency using structured workflows. Designed scalable system architecture with efficient data handling and reporting capabilities. Emphasized user friendly interfaces and logical data flow for easy stock monitoring and management. Supports better decision making through accurate and up to date inventory insights.

Technology used : Figma , Visual Studio(c#) Code, MYSQL, Git Hub
